

FALL ARRESTORS

A range of retractable lifelines that reduces the shock loading on the body by limiting the distance of fall. Used in work inspection, general construction, maintenance, oil production, telecommunications, mining and confined work areas.

HARU® Fall Arrestors provide continuous protection against falls. The Fall Arrestor automatically extends and retracts to allow freedom of movement. Each unit includes anchorage ropes.

HARU® Fall Arrestors are manufactured in a ISO 9001:2008 factory and all products are CE approved.
